

ITCL

ITCL: Ready for Inspection Tank and Vessel Cleaning

What is it?

As part of our vast portfolio of services ITCL can offer the skills, expertise and equipment to professionally clean and decontaminate all types and sizes of vessels and tanks, either externally or with man entry where necessary.

We can provide a complete service, beginning with a comprehensive site survey right through to the issue of a gas free certificate, where required.

Once your order is received a bespoke Health & Safety pack is produced, including where applicable; Method Statements, Risk Assessments, Confined Space Permit details etc, to enable job specific training.

We can also provide any necessary jetting units, breathing apparatus, safety equipment, hot/cold cutting tools and support vehicles to guarantee that the job is completed efficiently and professionally.

If requested we will also provide an assessment on the expected waste arisings and arrange for their removal to the most suitable fully licensed recovery or treatment facility.

Our enhanced service in this sector is in partnership with Ancorra Environmental Services, Knowsley, UK.

Why should I use ITCL?

Our workforce is fully qualified to current standards and works to approved procedures and control checks. Environmental and Health & Safety issues are of paramount concern to all staff working on your site. Expert consultation is always available.

ITCL offers a comprehensive 24hr in-house and on-site service.
